

The Shape ~ OF ~ Love is the Spiritual-Geometry ~ OF ~ [BEYOND]

By

Kora Bales

The identity-matrix of consciousness, for Spiritual conceptualization and comprehension purposes, may be conceived of as 'layered'. For example, through meditation, this may be observed for oneself via the application of a one-pointed, willful-focus, through and within the perceptual-experience of what is consciously recognized as Intuition, or the Presence of God. That is, conscious-Intuition of movement through these geometrical-Spiritual 'self-layers' within meditation, locates one within the Presence of God, which is Self-Realization.

To comprehend the gestalt of this experience for oneself, the consciousness must realize it's own reflective nature, and the paradigm of how this reflectivity creates one's own experiential-perceptual, as well as Spiritual realities. That is, one must travel-through a paradoxical-focus of one-pointed-concentration, within consciousness-application, to have Self-Realization, and in this way, consciously-knows his own geometrical-love-comprehension, or Intuition.

Meditation is the prescription that is the provision for this consciousness-matriculation. This is because by setting aside *what seems to matter, and trading 'whatever' for less chatter*, a new-realized stillness begins to beckon. Further, traveling inward through one's focus in an observing-restful state, creates the necessary dynamic of self-loving that is the prerequisite to engendering dissolution of boundary-thinking.

I have been observing my own self-realization processes play-out for a while now. The adventure has twirled-into an experience of my own consciousness as a reflection-beyond-deflection. I no longer harbor grudges or misconceptions; instead, I Practice His Presence, and in That, I have found my own redemption.

This doctoral thesis is an iteration of my own Self-Realization, wherein I have learned about 'Spiritual-Geometry' within meditation. You will observe my own investigation into Spirituality and symbol-relations within the world's history, wherein **I will make the case for True-Spiritual Self-Realization-Comprehension as one of 'No-Division'. That is, I make the case herein, that through the development of one's own consciousness via method within-meditation, the Spiritual 'Re-conditioning' that occurs, re-makes one's self-understanding into Self-Realization, or**

conscious-awareness of one's own symbolic-use of Intuition. This is a state of Self-as-One with God's Comprehension.

NOTES TO DEVELOP ~~~>>>

Experiential Perception and the Presence of God

A Brief Deconstruction of the Geometry-of-Consciousness

Heaven is a consciousness-location.

Review of Literature

We live via symbols, and their meanings are determined within one's own awareness, via sensory input, and are made relevant or meaningful via personalized "natural-boundlessness," within one's own awareness, that is the paradoxical state of every consciousness. This awareness is noticeable. For example, "boundlessness" within one's-own consciousness, is simply the experience of any "review" within cognition.

That is, a "chosen-tone," or gradation of kindness, which empowers that consciousness so-focused, to comprehend beyond its own "identity," is the metaphorical-relation of actually noticing that you are using symbols as separate tools ~ for reflecting "you" ~ through whatever is noticed.

This naturally then connects the consciousness'-awareness to that culture presented, or miniscule bit of whatever, that is noticed within that moment.

Further, this relation of kindness ~ in all-ways toward self and others ~ is the creationary spiritual-polarization of one's-own heart-freedom. The state of kindness ~ thus ~ is the "letting-go" of "the-have-to" attitude, and instead is embracing within oneself, that higher path of inner "ego-bending," wherein the "but-if's" and "if-buts," within one's-own "thinking-process," are no longer dominant within one's-own behavioral-outplaying. Literally, kindness leads to that consciousness experiencing momentary awareness, within that boundlessness of consciousness.

The result of choosing the "kindness-tone," as one's inner-perspective, is the option of "unwitting" devotion, to that inner-higher-station, of conceiving of "self" as honestly meaningless, because whatever presents ~ that has got you bending egos to devotionally-serve within the only moment, is the paradoxical glory of The Presence within one's-own-awareness.

It is very easy to examine this "reflective" aspect of one's own awareness -to spiritually comprehend that symbolic-meaning is derived via observation - via simply maintaining an unaffected, pointed-stillness, within that boundless-awareness, continuously.

Although this paper is the establishment of “beyond-belief” proportions ~ meaning, the point here is to prove what seems impossible ~ as in God-Consciousness as literally occurring within my own experience ~ is to begin to cognize beyond your own limitation-mentality, and create a distance of “interpretation” ~ similar to artistic-rendering ~ which must be established.

For example, in all spiritual texts of holy-excellence, determined by historical spiritual-experiences, there is the use of metaphoric and metonymic overlay within that Spiritual writing, which engenders higher-functions within cognition to “become active.”

This is because a metaphoric statement connects the “individual-self” orientation within awareness, within a comparison of disparity and simultaneous affinity of one’s own comprehension of the parts of that metaphor, challenging cognition to orient beyond the parts not literally applicable within meanings, perceived as “separate-similar,” yet disparate parts, described within that statement.

An example metaphor might be “A mighty fortress is our God.”

Metaphor is the creative application within writing, of the literal tool within cognition, that advances “identity” as a matrix, forward toward comprehension of “self” in relation to that which seems outside of that self-perceived (society/culture).

And when metaphor is simultaneously wielded with metonymy - within those holy poetic-iterations of symbolism discerned through metaphor within cognition [any “thing” discerned as symbolic] - the challenge increases within cognition, as the addition of metonym as a process within that cognition of interpretations, begins to work within consciousness to determine that “personalized” meaning for the symbol under consideration.

Lastly, metonym is a word or phrase used in [metonymy](#), which is a figure of speech, in which the name of one object or concept is used for that of another, to which it is related:

“The crown” is a metonym for “royalty,” or “That” is a metonym for “God.”
